

Board of the Belgian Society of Nuclear Medicine,

Leuven, February 9th 2022

Dear members of the Belnuc board,

I would like to present myself as a candidate for the upcoming board elections in March 2022 as a regular board member.

I was trained as medical doctor and nuclear medicine physician in the Netherlands, just before the training program was merged with the radiology training program. This training program contained a rotation in radiology of at least one year, where I participated in the head and neck, thoracic and abdominal imaging sections.

After two years in a large teaching hospital in Eindhoven, practising general nuclear medicine, I found the wonderful opportunity to come to Belgium.

End 2017 I started in Leuven as a member of the medical staff. Here I developed a clinical interest in nuclear endocrinology, musculoskeletal imaging, nuclear cardiology and in the oncological fields of head and neck tumours and the genitourinary system.

From these areas of interest, I would like to contribute to the duties of the Belnuc board as regular board.

Yours sincerely,

Sander Jentjens
