Re: Application Board member Belnuc

Dear,

My name is Stijn Van Hecke, staff member of the department of Nuclear Medicine of the Hospital East Limburg. The department has two campuses, several gamma cameras and a PET-CT camera and performs more than 14,000 examinations annually. Metabolic therapies are also an integral part of the service's offering and the service is recognized as a training site for nuclear physicians.

I would like to make a contribution to our discipline in Belgium. Therefore I would like to apply for a position of board member within the BELNUC board and, together with the other members of the board, ensure the further development of our discipline in Belgium.

With collegial regards,

Stijn Van Hecke
